ISO 9001: 2015

Its requirements define how to establish, implement, maintain, and continually improve a quality management system (QMS).

ISO 14001: 2015

Helps an organization achieve the intended outcomes of its environmental management system, which provide value for the environment, the organization itself and interested parties. Consistent with the organization's environmental policy

ISO 45001: 2018

Specifies requirements for an occupational health and safety (OH&S) management system, and gives guidance for its use, to enable organizations to provide safe and healthy workplaces by preventing work-related injury and ill health, as well as by proactively improving its OH&S performance.

ISO 28000: 2007

Specifies the requirements for a security management system, including those aspects critical to security assurance of the supply chain. Security management is linked to many other aspects of business management. Aspects include all activities controlled or influenced by organizations that impact on supply chain security. These other aspects should be considered directly, where and when they have an impact on security management, including transporting these goods along the supply chain.

Most Roly products have this certificate that guarantees their commitment to all environmental requirements during the manufacturing process and that the fabrics, their dyes and any component of the garment, do not contain harmful or dangerous substances.

AITEK

ILO

All factories which manufacture our products observe the requirements of Geneva Convention of November 1973 n° 138, which regulates the minimum age for employing minors.

FAIRTRADE

Fairtrade achieves this by rallying a global community of millions – farmers and workers, supply chain partners, brands, retailers, shoppers, schools, government – to pay fair prices and uphold fair production standards and practices.

PEFC

Roly is a member of PEFC, a program that promotes the sustainable management of forests to achieve a social, economic and environmental balance, which is why the paper used in this catalogue, and of most of the material printed by the company, is obtained from wood from sustainable forests.

MATERIALS

MOST OF THE MATERIALS WE USE IN THE MANUFACTURE OF OUR PRODUCTS ARE NATURAL OR RECYCLED. THANKS TO THIS, IN ADDITION TO CONTRIBUTING TO THE RESPONSIBILITY OF HAVING A MORE SUSTAINABLE WORLD, THESE MATERIALS ALLOW US TO CREATE INNOVATIVE AND VERSATILE PRODUCTS, WITH A VARIETY OF FINISHES AND TEXTURES THAT ADAPT TO ALL TYPES OF SPACES.

RECYCLED STEEL

Steel is 100% recyclable, that is, after the recycling process the same material is obtained with the same quality, over and over again.

Recycling steel prevents the equivalent of 14 tanks of gasoline from being released into the atmosphere for a medium-sized car.

Even recycling a single container containing steel can save enough energy to keep a LED light bulb on for hours.

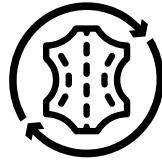

RECYCLED ALUMINIUM

Aluminium is a highly recyclable material. It is easy to handle, light in weight, does not break, does not burn and does not rust, can be easily compacted, taking up little space. In addition, it can be 100% easily recycled without losing quality.

RECYCLED LEATHER

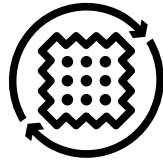

Leather is one of the oldest, most durable and versatile natural materials available.

Thanks to its recycling, we give a new use to those leather residues originating from fashion or from the processing and treatment of the material mostly small pieces of processed leather.

RECYCLED FELT FABRIC

Recycled felt is a versatile and sustainable material obtained from recycled textile fibres such as wool, cotton and polyester.

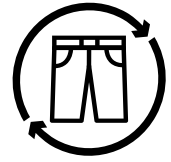

Recycled felt is an appealing option for those looking for a sustainable and creative material.

Its versatility, combined with its contribution to reducing textile waste, makes it an increasingly popular choice in a variety of applications, from fashion to home décor and sustainable construction.

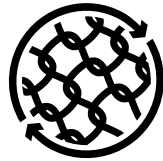

RECYCLED DENIM

Recycled denim is an innovative and sustainable option that reuses previously used denim fabrics.

This recycling process transforms discarded jeans into a new raw material, preserving the strength and distinctive texture of denim. This renewed material is used in bags, backpacks and caps, which can be found in the “Bags & Travel” and “Leisure & Sports” collections.

RECYCLED NYLON

Recycled nylon material derived from the processing of waste such as fishing nets, carpets or textiles.

Through various recycling technologies, these wastes are transformed into new nylon, maintaining its resistance and quality.

RECYCLED PET

Recycled pet or rPET, is the most recycled material in the world, helping to reduce plastics with which pet bottles are manufactured and offering a new life to their waste.

It stands out for being resistant and acting effectively as a protection and barrier against water vapour and oxygen.

STONE PAPER

Stone paper is an innovation that uses the mineral components found in different types of stones, through an extraction process.

Its versatility lies in its resistance, durability and ability to adapt to various applications, offering a sustainable and unique alternative that fuses nature with modern engineering.

MILK CARTON

Recycled milk carton is a sustainable alternative obtained from the recycling of cardboard containers used in the packaging of dairy products.

This recycling process transforms these containers into a renewed and resistant material, preserving its original durability.

Recycled milk carton is used to make a variety of products, from paper and cardboard, contributing to waste reduction.

RECYCLED CARDBOARD

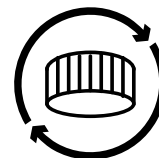

Recycled cardboard is a sustainable resource obtained from the reuse of paper and cardboard recovered from various sources, such as packaging, boxes and waste paper.

This recycled material contributes significantly to the reduction of waste and the conservation of forest resources, promoting environmentally friendly practices.

RECYCLED BOTTLE CAPS

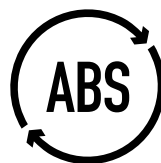

Recycled caps are a renewable option obtained from the reuse of bottle caps.

Transformed through ecological processes, this material retains the original durability and resistance of recycled plastics. It is used in speakers, chargers, power banks and many more items with an original design.

RECYCLED ABS

Recycled ABS or R-ABS is a tough, durable plastic that does not corrode easily when it comes into contact with abrasive materials.

It is the result obtained after the recycling process of the ABS material, helping it not to be wasted and discarded after a single use.

PLA

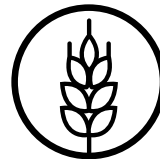

Also called polylactic acid, it is derived from natural and renewable raw materials, such as corn, beetroot and other starch-rich products.

WHEAT FIBER

Wheat fibre is an agro-industrial residue produced during the extraction of cereal grains.

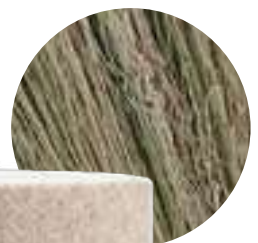

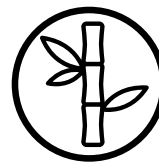

Originally used for livestock feed or as fodder, in recent years it has begun to be used as a bioplastic derived from plant origin, helping to reduce the consumption of plastic.

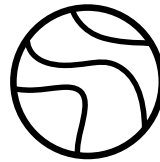

BAMBOO FIBER

Bamboo fibre is a natural fibre that is obtained from the filaments of the plant.

Its use as an additive in different compounds results in aesthetically attractive products that provide a touch of naturalness.

MARBLE STONE

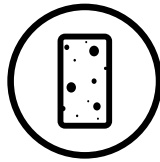

Marble is a metamorphic rock formed from limestone rocks subjected to high temperatures and pressures in the earth's crust.

Its main composition is calcium carbonate, which gives it its characteristic streaked appearance and its wide range of colours and patterns.

CORK

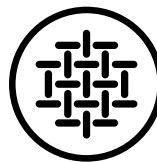

Cork is an environmentally friendly, biodegradable, recyclable and sustainable material. It is obtained from the bark of the cork oak, which is regenerated every year.

It is highly valued for its lightness and strength. It is also a very good insulator. For example, in the form of a yoga mat it blocks the cold that rises from a cold floor. Added to this is its elegant and natural aesthetic.

NATURAL JUTE

Known as the 'golden fibre', jute is one of the most widely used natural fibers for various textile applications since ancient times.

It is a very strong and durable fibre, with insulating and antistatic properties. It is 100% biodegradable and recyclable and therefore environmentally friendly.

WOOD

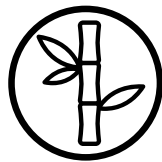

Wood is a timeless and immortal material that fits perfectly with any decorative style, bringing a distinctive touch to the space in which it is placed.

In addition to advantages such as strength and durability, natural wood in the home brings a good amount of benefits, including some that act directly on health.

BAMBOO

Bamboo is a natural, ecological and sustainable material. Due to the rapid growth of the plant, it is a very renewable material. Its advantages are multiple and it is a good alternative to the use of wood.

It is known as “Plant Steel” for its resistance to certain stresses and its good seismic behaviour.

It is also a very flexible and a lightweight material.

STRAW

Known as the “golden fibre”, jute is one of the most used natural fibres for various textile applications since ancient times.

It is a very strong and durable fibre, with insulating and antistatic properties.

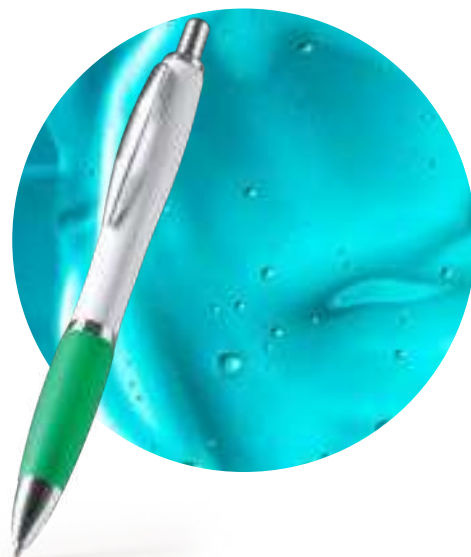

It is 100% biodegradable and recyclable and, therefore, harmless to the environment.

ANTIBACTERIAL

Material treated with silver ions, which prevents the proliferation of pathogenic microorganisms.

TRITAN

Tritan is a new generation of recyclable and health-safe copolyester resins.

This material is free from BPA, bps and any other type of bisphenol.

HEMP

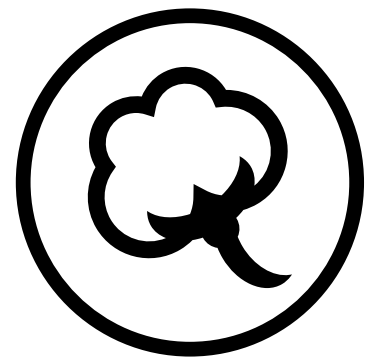

Hemp is considered the most resistant, soft, and durable textile fibre of vegetable origin. Its fabric is one of the oldest and most ecological, it is made from fibers that are extracted from the inside of the stem of the cannabis plant, which is of plant origin and biodegradable.

Its great flexibility makes it ideal for making garments and accessories.

ORGANIC COTTON

Organic cotton is a cotton that is produced and certified according to organic agricultural standards.

It is soft, comfortable, and hypoallergenic.

This fabric has the same quality as natural cotton and its cultivation creates a minimum impact on the environment.

RECYCLED COTTON

Recycled cotton is obtained from used clothing or garment remnants. Its production reduces the amount of energy, water and dyes required.

Therefore, it is one of the most sustainable and most respectful fabrics in all its processes.

FAIRTRADE **COTTON** **COTTON**

The products made with certified fair trade cotton guarantees the support of cotton growers so that they improve their quality of life and their communities, contributing to protect people and the environment.
